Re: WFTL (AM), West Palm Beach, Florida
Facility Identification Number: 29490
JCE Licenses, LLC
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 22, 2007, on behalf of JCE Licenses, LLC ("JCE"). JCE requests further extension of STA for operation of Station WFTL pursuant to Section 73.1615. In support of the request, JCE states that its application for modification of construction permit, File No. BMP-20031024AAV, remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoration of licensed operation. Thus, extension of STA is warranted. We note that Applications BL-20050104ABJ and BMP-20031024AAV remain pending¹.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WFTL may continue to operate pursuant to Section 73.1615 with the substantially adjusted directional antenna facilities authorized by Construction Permit BP-19990521AL, as proposed for modification in Application BMP-20031024AAV. It will be necessary to further reduce power or cease operation if complaints of interference are received. JCE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess

¹ Application BMP-20031024AAV was dismissed by the staff on April 27, 2007; a Petition for Reconsideration accompanied by a corrective technical amendment has been filed and remains pending.

of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein is expressly conditioned on the grant of Application BMP-20031024AAV, and against the grant of Application BP-19890109AB. In the event that Application BMP-20031024AAV is dismissed or denied, or in the event that Application BP-19890109AB is granted, the WFTL daytime antenna system must be readjusted to conform with the directional antenna specifications authorized by Construction Permit BP-19990521A1, a new daytime proof of performance must be conducted and the license application must be amended accordingly.

This authority expires on **April 3, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
